

RECOILLESS HIGH PERFORMANCE AIR SAW

STRONG: Most air saws stall when you try to saw in curves. Our saw works!

DURABLE: Only saw with built in protection against excessive air pressures!
Blade holder from hardened steel.

ERGONOMIC: Feel the difference! Most other saws should be used only a few minutes per day to avoid vibration induced long-term problems with fingers.

High Production Rate
Low Air Consumption
Low Noise Level

Rotating Throttle
Smooth Operation
Easy to Work With

COMPARE SRV-110 to a conventional saw. You will see a large difference in efficiency when you saw in curves and the operation is much smoother (80-90 % less vibration). Don't believe claims of reduced vibration without comparing with SRV-110!

RUGGED design, most parts from hardened steel. Plastic covered handle for COMFORT.

IDEAL for sheet metal, auto body panels, duct work, building side panels, fiber-reinforced plastic, insulation etc.

SPECIFICATIONS:

Patents Pending

Model	Vibration Level	Blows per min.	Air Cons.	Length	Weight	Hose Conn.	Size Hose Rec.
SRV-110	2 m/s ²	9,900	1.5 l/s	210 mm	1.05 kg	1/4"	1/4"

Performance figures are at 6.5 bar (95 psi) air pressure.

NOTE: SRV-110 will operate as an excellent file as well.
